

Trial 3: DigeGrain Delta with and without Phytase

Location of trial	Kangwon National University, South Korea
Year of trial	2015
Strain used	Ross 308

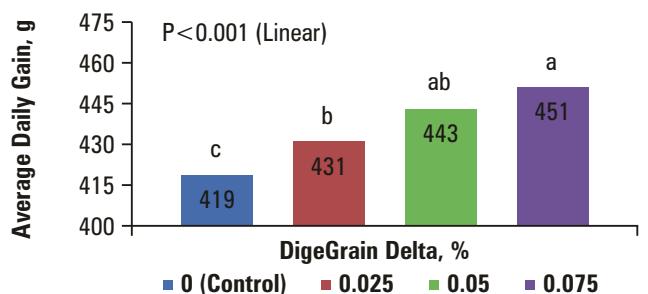

Performance in Pigs

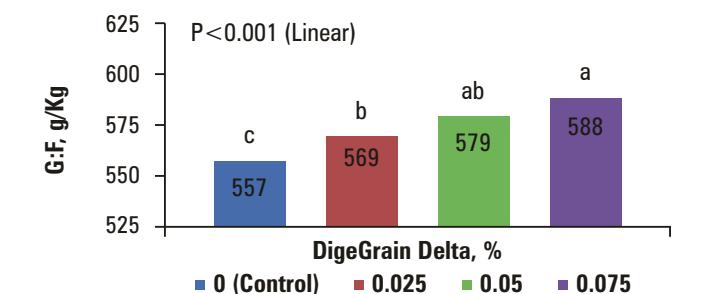

Trial 4: Dose study

Location of trial	Kangwon National University, South Korea
Year of trial	2014
Strain used	Landrace x Yorkshire x Duroc cross

Average Daily Gain, g (d 0-42)

Growth to feed ratio, g/Kg (d 0-42)

Matrix Value of DigeGrain Delta - Weaning Pigs			
DigeGrain Delta, %	0.025	0.05	0.075
ME Kcal/kg feed	56	75	87
CP Matrix, %	0.21	0.35	0.34
P Matrix, %	0.05	0.07	0.08

P.S. Diet for trial: Corn SBM

Recommended Dose:

	Broilers / Weaning Pigs
Through feed, g/ton	250 to 500
Through drinking water, g/1000 litre water	125 to 250
Through water medicators, enzyme (g): water (ml)	1: 4,000 to 1:8,000
Post pelleting applications, g/ton pellets	250 to 500

* The economical optimum dose of DigeGrain Delta may vary depending upon stage of growth and available feed ingredients

Form:

Powder and liquid

Packaging:

In 25kg HDPE drums / 30kg Jerry cans

Animal Feed - Our Offerings

Product Name	Enzyme Type
DigeGrain X	Xylanase
DigeGrain M	Mannanase
DigeGrain G	endo beta-1,4 glucanase
DigeGrain C	Cellulase
DigeGrain Pro	Protease (acidic and alkaline)
DigePhos	Phytase 5,000 and 10,000
DigeGrain Max	Amylase, xylanase, mannanase, glucanase, cellulase, pectinase
DigeGrain Delta	Amylase, xylanase, mannanase, protease & phytase
DigeGrain Delta Plus	Amylase, xylanase, mannanase, glucanase, cellulase, pectinase, protease & phytase
DigeGrain Super	Amylase, xylanase, mannanase, pectinase, cellulase, beta-glucanase, alpha galactosidase, protease, lipase, phytase, <i>Bacillus subtilis</i> & <i>Bacillus coagulans</i>
AciGrain (Feed Acidifier)	Blend of organic acids and their salts
Probiotics Products	<i>Bacillus subtilis</i> , <i>Bacillus coagulans</i> , <i>Saccharomyces boulardii</i> , multi microbe probiotics

P.S. Single enzymes and customized blends are available on request

About Us

Advanced Enzymes is a research driven company with global leadership in the manufacturing of enzymes. We are committed to providing eco-safe solutions for a wide variety of industries like Human Healthcare and Nutrition, Animal Nutrition, Food and Industrial Processing.

- Animal Nutrition
- Baking
- Biocatalysis
- Biofuel
- Brewing & Malting
- Dairy & Cheese Processing
- Detergents & Cleaning Aids
- Fruit & Vegetable Processing
- Leather
- Oils & Fats Processing
- Pulp & Paper
- Protein Modification
- Specialty Applications
- Starch & Grain Processing
- Textile
- Wine Processing
- Yeast Processing

DigeGrain Delta

A Complete Enzyme for Complex Diets

- Unique multi-enzyme preparation containing mannanase, xylanase, amylase, protease and phytase
- Single product against NSP's, phytates and indigestible proteins
- Flexibility to use variety of raw materials
- Improve profitability
- Can reduce antibiotic growth promoters use
- Reduced environmental pollution

www.advancedenzymes.com

Complex substrate need complex enzyme

Commonly used feed ingredients in broiler diets contain varying levels of anti-nutritional factors like NSP's and phytates, which are not digested by monogastric animals due to lack of endogenous enzymes. Also, around 12-15% of dietary proteins remain undigested in poultry and causes environmental pollution. Studies on the use of exogenous enzymes to degrade NSP's and phytates have yielded inconsistent results mainly because of the presence of complex substrates in feedstuffs and the use of enzyme activities often not suitable for effective hydrolysis of such substrates. This indicates that combinations of different enzyme activities are required for complete degradation of complex feed and to improve nutrient utilization and performance of broilers.

NSP content of common feed ingredients

Ingredients	NSP %	Arabinoxylan, %	Glucan, %	Cellulose, %	Mannan, %	Galactose, %	
	Soluble	Insoluble					
Corn	10.1	0.1	5.1	-	2	0.2	0.6
SBM	21.7	0.75	2.25	-	6.2	1.8	4.1
Wheat	11.4	1.8	6.3	0.8	2	0.1	0.3
Barley	16.7	0.8	7.1	4.3	3.9	0.5	0.2
Rye	13.2	3.4	5.5	2	1.5	0.7	0.3
Sorghum	6.45	0.12	3.8	0.2	2	0.1	0.15
Sunflower cake	31.5	0.8	5.2	-	12.3	1.5	1.3
Corn DDGS	28.6	0.4	-	-	7.1	0.7	2.1

Feather meal	85	50-75	56	50	54	45	67	65	72	58
MBM	50	65-80	70	63	60	55	78	72	70	67

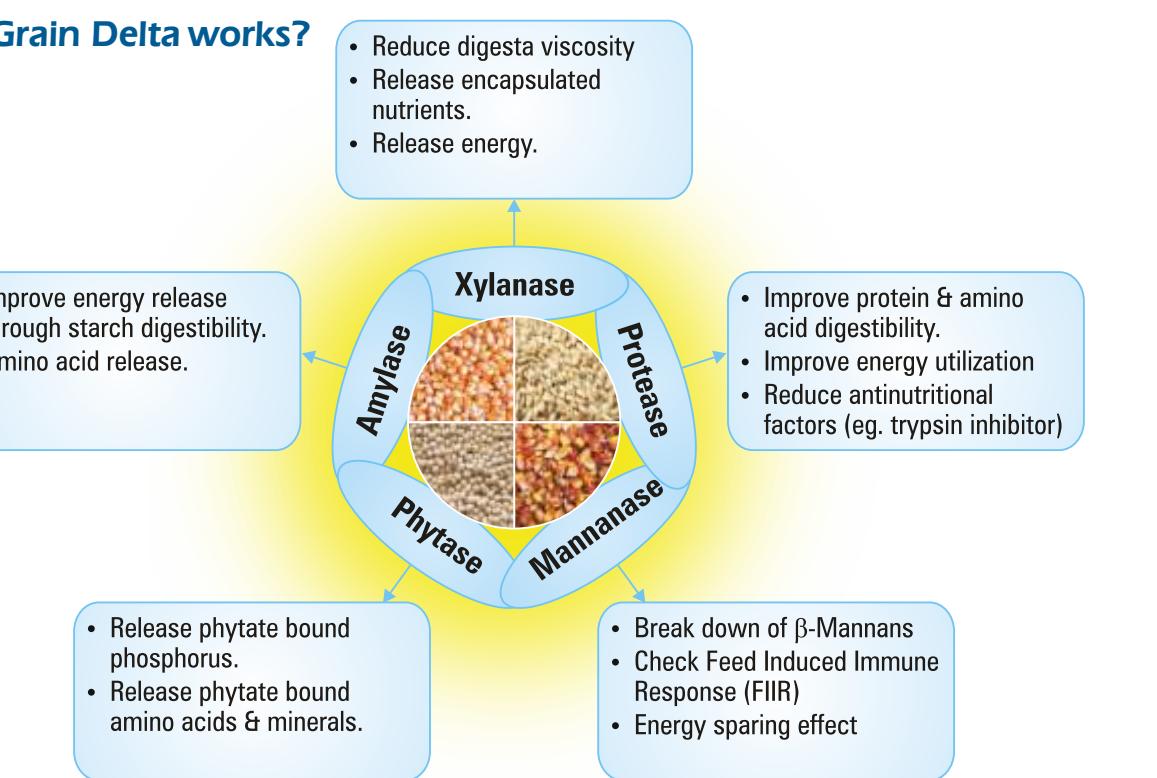

Our Solution

DigeGrain Delta

Specifications:

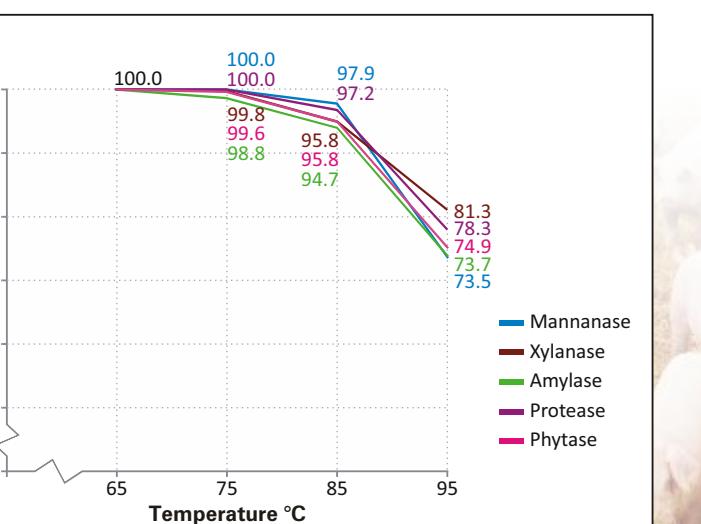

Enzymes	Units
Mannannase	2,500,000 U/kg
Xylanase	600,000 U/kg
Amylase	800,000 U/kg
Protease	1,000,000 U/kg
Phytase	1,000,000 U/kg

How DigeGrain Delta works?

Pelleting stability:

All enzymes in DigeGrain Delta are found to be heat stable up to 85°C for 45 to 60 seconds

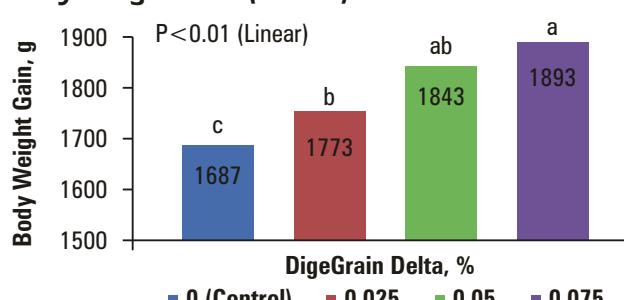

Performance in Broilers

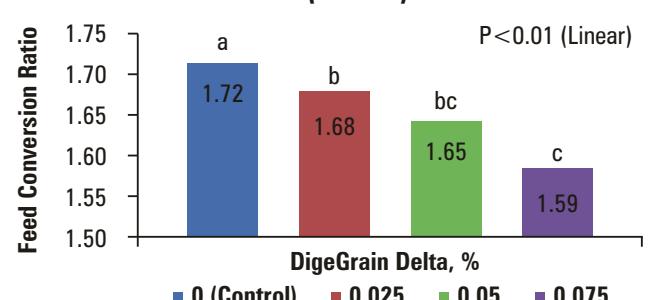

Trial 1: Dose study

Location of trial	Kangwon National University, South Korea
Year of trial	2014
Strain used	Ross 308

Body Weight Gain (d 7-35)

Feed Conversion Ratio (d 7-35)
